Mesh Nebulizer Cleaning Instructions

*Before cleaning make sure to remove batteries from your device or unplug device from electricity. Please place a paper towel on the surface where you are performing the cleaning.

**Step 1:** Ensure the device has completed the medicine delivery cycle and has turned off.

**Step 2:** Remove the Mouthpiece and/or Mask Adapter and Mask from the Main Unit.

**Step 3:** Remove the Medication Cup from the Main Unit.

**Step 4:** Remove the Mesh Cap counterclockwise from the Medication Cup and make sure to pour out the any remaining medication.

Properly cleaning your SootheNeb with distilled water after each use will help prevent medication to build up in the medication cup and on the mesh cap. It is important to ensure proper cleaning after each use to help the longevity and functionality of your SootheNeb Nebulizer.
**Step 5:** Place the Medication Cup back on to the Main Unit. Make sure you hear a “click” to ensure the Medication Cup was placed correctly.

**Step 6:** Rinse the Mesh Cap with distilled water and set aside on the towel.

**Step 7:** *(For Battery Only)* Place 2 AA batteries back into the device. Ensure the batteries are placed correctly.

**Step 8:** Pour a small amount (approximately 1 ml) of distilled water into the Medication Cup and twist the Mesh Cap clockwise to close the Medication Cup.

**Step 9:** Turn on the device to nebulize the distilled water for 1 to 2 minutes to remove residual medication from the mesh holes.

**Step 10:** After device has nebulized, turn off the device and remove the Medication Cup from the Main Unit.

**Step 11:** Remove the Mesh Cap from the Medication Cup and discard any remaining distilled water from the Medication Cup.

**Step 12:** Rinse all accessories with distilled water. *(Mesh Cap, Mask, Mouthpiece, and Mouthpiece Adapter)*

**CAUTION:** DO NOT IMMERSE MEDICATION CUP IN DISTILLED WATER.

**Step 13:** Gently wipe off excess water with a clean cloth or allow the parts to air dry in a clean environment on the towel.

**CAUTION:** DO NOT WIPE THE MESH CAP. ALLOW MESH CAP TO AIR DRY BY FACING THE FLAT SIDE DOWN ON A CLEAN PAPER TOWEL.

**Step 14:** Store the device in a clean environment.
